Axicon PV-1000 Barcode Verifier

Seeking to add mobility to your quality assurance routine? Simply disconnect your verifier from your computer, link it to the PV-1000 and soon you'll be experiencing the consistently high reliability you've come to associate with Axicon, irrespective of your location. All barcodes are verified according to the most recent ISO/ANSI and GS1 protocols.

Key Features

Accurate ANSI/ISO grade verification
Optional printer for report generation
Facility to transmit data to PC for print / record-keeping
ISO/IEC compliant verification
Lightweight and portable

The PV-1000 unit acts as a mobile display and data collector, designed to synergise with your existing Axicon verifier. It can be used with any of the following linear barcode verifiers the 6015, 6515 and 7015; and allows you to carry out verification without any connection to a laptop or PC.

You can see the overall grade for each symbol, as well as the values for individual parameters while you are using it. The PV-1000 will also keep all your results as text or Axicons .scn files which you can transfer to your PC using a USB memory stick. This means the results can be recorded as part of any quality control system.

Additional options include a portable printer to enable immediate off-site printing. The PV-1000 and the printer are battery powered and they will work for approximately 8 hours before needing to be recharged or have the four AA batteries changed. To use an existing printer a standard serial (RS232) printer is required.

TECHNICAL SPECIFICATIONS

Dimensions (H x W x D):
180 x 40 x 95mm

Weight:
400g (14oz) includes batteries

Construction: ABS plastic

PERFORMANCE CHARACTERISTICS:

Display Window: 2 Line LCD display
Calibration logging: Record of date and time for ISO 9001 records
Scanning Technology: EAN-8, EAN-13 and UPC-A (with or without add-ons), UPC-E, GS1 DataBar (all symbols), ITF 14, GS1-128, Code 39, Code 93, Code 128, Codebar, ITF, MSI Plessey, (all symbols no wider than 66mm). Refer to Product Reference Guide for complete list of symbologies
Print facilities: Printing to optional serial printer from printer cable. Print records can be stored within the memory of the PV-1000 and then subsequently transferred to a PC via a USB memory stick for printing.

OPTIONS:

Protective rubber case, portable serial printer, ticket printer.
Reflex can configure and supply printers, rewinders and applicators to create an automated workflow.
