Reflex's UTech In-line Labeller for Cylindrical Products

A premium and affordable industrial in-line print and apply labeller range. It is designed as a real time print and application system with pneumatic application (except Power option which is wipe-on) of self-adhesive labels for both still and moving objects. The range offers wide possibilities of positioning labels to case and can apply labels from 104mm to 170mm high and up to 500mm long. Crucially it has a compact design to enable it fit into tight production lines where space is restricted.

Key Features

Can be supplied for left or right handling depending on operational requirements

Easy to use colour digital touchscreen

Store up to 50 label settings

Protected engineering mode

Release mechanism to remove backing paper easily

Operates with self-adhesive labels roll up to 300mm outside diameter on either 38mm or 76mm cores

Why choose Reflex's UTech Labeller?

The Reflex Utech is the ideal solution for accurate positioning of labels to products and can be easily integrated with existing production lines.

It eliminates the need for applying labels by hand, providing time and manpower savings whilst ensuring consistent quality.

The printer/applicator is available in several configurations to offer side, top, front and over-corner application operations to ensure labels are applied consistently and with precision

Directions

Optional Extras

Castors for flexibility to label on different production lines

Fully adjustable column mount

Ultrasonic sensor to apply clear labels

Mounting plate for inkjet or thermal transfer printer

End of label detection with visual beacon

Rotary encoder to label products on a variable speed conveyor

Production rejection system

Critical spares kit

Rotary collecting tables on the infeed or outfeed of the conveyor

OPTIONS:
